Mr. Robert Lamme  
Hobart Brothers Company  
600 West Main Street  
Troy, Ohio 45373

Dear Mr. Lamme:

This will confirm our meeting of January 23, 1980, and your telephone conversation with Mr. Joe Moore of this office on January 25, 1980.

The purpose of our meeting was to evaluate your solid industrial waste, which consists of stick electrode, wire dry lube, and dust from the baghouses, for possible disposal in a licensed sanitary landfill. This proposal was the result of your decision to cease the disposal of waste on your own properties located directly behind your plant and across from the fairgrounds along State Route 25A. No further disposal of waste should be continued at these two sites without first obtaining the proper approvals and permits from the Ohio EPA.

As a result of our meeting and later telephone conversation, we have agreed to allow Hobart Brothers to dispose of their solid industrial waste at the IWD landfill located at 3110 Snyder Domer Road, Springfield, Ohio for two weeks pending receipt of the leachate test results of your waste. A final decision on the disposal of your waste will then be made as soon as possible.

Should you have any further questions, please feel free to contact either Joe Moore or myself at our office in Dayton at (513) 461-4670.

Very truly yours,

*Donald S. Marshall*
